

Creel Loading Articulating Arm

WITH AIR BALANCE HOIST AND MODEL 476 SPOOL GRASPER

- ◇ Cost effective, manual creel loading solution for creel systems shorter than 20 FT in length
- ◇ Load both sides of a short creel system via one centrally located articulating arm
- ◇ Retrofittable to RJS Creel Systems with 10 x 10 IN top pads on the creel frame
- ◇ Uses the same air balance hoist and spool grasper as the Model 477 Creel Loading design
- ◇ Swivel air connection at the center to allow full 360° motion without hose tangling
- ◇ Available in two configurations for spool grasper clearance above or next to the creel frame
